

126544 - Are Tooth Gems Haram?

the question

What is the ruling on having a diamond fitted on the tooth for cosmetic purposes?

Summary of answer

There is nothing wrong with a woman having a diamond fitted on her tooth for cosmetic purposes because the basic principle is that it is permissible.

Detailed answer

Praise be to Allah.

There is nothing wrong with a woman having a diamond fitted on her tooth for cosmetic purposes, because the basic principle is that it is permissible. We do not know of any reason why she should not do that, unless she is doing it for cosmetic purposes in ways that are forbidden because she will show it in front of [non-mahram men](#) , or this diamond is fitted by a non-mahram man, because there is no case of need which would make it permissible for her to uncover in front of him in that case, or if the matter reaches the level of extravagance and wasting money.

Shaykh Ibn 'Uthaymin (may Allah have mercy on him) has issued a fatwa stating that [it is permissible for a woman to have gold teeth fitted](#) if that is customary for cosmetic purposes among women.
