

## 130711 - Is Masturbation a Major Sin?

---

### the question

In Islam, there are two types of sin, that is big sin and small sin...My question is, what type of sin is categorized with masturbation and watching pornographic and what is the punishment for the sin in hell?

### Summary of answer

If masturbation happens just once in order to reduce the pressure of desire, Allah may pardon that because it is a minor sin. However, persisting in masturbation is a major sin.

### Detailed answer

Every Muslim is obliged to keep away from these images and movies which provoke desire and push one to do sinful actions such as [masturbation](#) or [adultery](#), so that this avoidance will be a means of protecting oneself against prohibited things.

There is no doubt that watching them and [persisting in doing so is a major sin](#), because there is no minor sin if one persists in doing it.

The one who persists in doing it is regarded as having fallen into major sin because of his persistence, unlike the one who sees it just once, such as an accidental glance and the like; in that case it is regarded as a minor sin.

The same applies to [masturbation](#); if it happens just once in order to reduce the pressure of desire, Allah may pardon that because it is a minor sin, but [persisting in it is a major sin](#).
