## 2169 - Drops of urine come out after going to the washroom

---

### the question

What should a person do if he urinates and cleans his penis (by squeezing it), then when he has finished urinating, some drops of urine come out? These drops might come out a minute or more after he has finished, and sometimes it happens after he has finished doing wudoo', and it is involuntary on his part. If he washes it several times, what should he do after that?

### Detailed answer

Praise be to Allaah.

There is no need to clean one's penis in this manner after urinating. If it happens that some drops of urine come out after doing wudoo', he has to repeat his wudoo', and wash the place where the impurity (najaasah) is.
