

## 292125 - Ruling on using a retainer during the day of Ramadan

---

### the question

What is the ruling on wearing a see-through retainer during the day in Ramadan, noting that there are some solid deposits on it that resemble salt, and it is difficult to clean them off completely?

The retainer is used after the teeth have been straightened with braces.

### Detailed answer

Praise be to Allah.

There is nothing wrong with using a retainer during the day in Ramadan, and what you mentioned about dry deposits, that do not dissolve in the mouth, does not affect that.

But these deposits should be cleaned off and removed whenever they form.

If it is difficult to remove them, they may be left as they are, and that does not affect the fast, as noted above.

And Allah knows best.
